What is System Administration?

LATEST SUBMISSION GRADE

83.33%

1.Question 1

Question

1 / 1 point

Correct

Nice work! When an employee obtains access to hardware, this falls into the procurement stage of the hardware lifecycle.

2.Question 2

Question

0 / 1 point

Incorrect

Not quite. Please refer back to Lesson 6 on User and Hardware Provisioning for a refresher.

3.Question 3

Question

1 / 1 point

Correct

That's exactly right! The deployment stage of the hardware lifecycle can also include situations where a script automatically configures user accounts and software. It doesn't just have to be a person who deploys the hardware.

4.Question 4

Question

0 / 1 point

Incorrect

Not quite. Please refer back to Lesson 6 on User and Hardware Provisioning for a refresher.

5.Question 5

Question

1 / 1 point

Correct

You nailed it! Blade servers are like rack servers, but even thinner! Very space-saving.

6.Question 6

Question

1 / 1 point

Correct

Great, you got all the right answers.

7.Question 7

Question

1 / 1 point

Correct

Great, you got all the right answers.

8.Question 8

Question

1 / 1 point

Correct

Well done! Batch update means that once every month or so, you update all your servers with the latest security patches. You'll have to find a time to take their services offline, perform the update, and verify that the new update works with the service.

9.Question 9

Question

1 / 1 point

Correct

You got it! Troubleshooting is the process of discovering the source of a problem. While updates might fix many problems, it doesn't really help identify the problem.

10.Question 10

Question

1 / 1 point

Correct

Awesome! KVM stands for keyboard, video and mouse. A KVM switch looks like a hub that you can connect multiple computers to and control them using one keyboard, mouse and monitor.

11.Question 11

Question

1 / 1 point

Correct

Woohoo! In smaller companies, it's usually a single person who manages an entire company's IT infrastructure.

12.Question 12

Question

1 / 1 point

Correct

You nailed it! Printing services are compatible with but irrelevant to KVM switches!
